

## 05mm x 30m anti -chuno wire cable with hook

The FZNHS anti-flame steel rope (30 meters) is an essential safety device for rescue and evacuation in high-risk environments. Manufactured with flame-retardant coating and high-strength steel, it ensures outstanding durability and mechanical resistance under extreme conditions. Certified under SOLAS/MED standards and approved by RINA, this rope guarantees reliability for professional rescue and marine operations. Supplied with a certified safety hook, it is ready for immediate deployment in emergencies.

**COD EUROSUL:** 000087

**IMPA:** 330971

**Part Number:** ---

**Approvals:**

## Specifications

**Features:**

**Model:** FZNHS

**Length:** 30 m

**Inner cable diameter:** 3.6 mm (steel)

**Outer diameter / Rope perimeter:**  $\geq 32$  mm

**Coating:** High-performance flame-retardant polymer, resistant to extreme heat

**Hook:** Included, with certified tensile strength of 3.5 kN for 5 minutes

**Approx. weight:** 4.8 kg (including hook)

**Nominal load capacity:**  $\geq 10$  kN

**Certification:** SOLAS/MED – RINA approved

**Color:** High visibility for use in smoke-filled environments

**Benefits:**

**Thermal resistance:** suitable for high-temperature operations

**Operational safety:** internationally certified for professional rescue operations

**Extreme durability:** steel inner core with flame-retardant outer coating

**Ready to use:** supplied with safety hook for immediate deployment

**Low maintenance:** robust structure designed for long service life under severe conditions

**Applications:**

**Firefighter rescue:** in fire areas or confined compartments

**Emergency evacuation:** on ships, offshore platforms, and industrial facilities

**Essential equipment:** for firefighting brigades and emergency response teams
