

08mm x 30m SISAL CABLE CABLE SISAL-CERTIFICATE GL HYN2 SOLAS CERTIFICATE

Hyn2 anti-chamma wire rope is essential equipment for rescue and safety operations in maritime and industrial environments. With a diameter of 8mm and a length of 30 meters, it is coated with sisal, providing thermal resistance and additional protection against abrasion. Designed for secure removal of firefighters and risk areas rescue teams, this cable meets the certification requirements and DNV-GL/MED, ensuring high performance and compliance with international safety standards.

COD EUROSUL: 002844

IMPA: ---

Part Number: ---

Approvals:

Specifications

Benefits:

High resistance: steel cable with sisal coating for increased durability

International certification: complies with SOLAS and DNV-GL/MED standards

Enhanced safety: designed for safe evacuation of firefighters and rescue teams

Load capacity: buckle strength withstands 3.5kN for 5 minutes

Technical Specifications:

Model: HYN2

Material: Stainless steel with sisal coating

Cable diameter: 8 mm

Length: 30 m

Inner steel diameter: 3.6 mm

Buckle strength: 3.5kN for 5 minutes

Rope perimeter: At least 32 mm

Certification: SOLAS / DNV-GL / MED
