

## 110/230V Battery Charger for Entel HT644, HT649, HT785 and HT783 Radios CSAHT

The Entel CSAHT battery charger is an essential accessory for safe and reliable charging of Entel HT series portable radios. Compatible with HT644, HT649, HT785, and HT783 models, it is designed for professional use in maritime, industrial, and safety operations. Operating on 110–230V power supply, the CSAHT charger offers flexibility for different working environments, making it suitable for fixed installations and operational bases. Its robust construction ensures durability and consistent performance for users who rely on uninterrupted communication.
