

## 12V Battery Charger for FSP127 Aldis

The C26664-01 battery charger is designed for 12V lead-acid batteries used in the FSP127 Aldis signaling lantern. With dual voltage input (100-240V) and 14.7V DC output at 1A, it ensures efficient and safe charging. Compact and durable, it meets CE, UKCA, and EN60601-1 standards, providing reliability for maritime and offshore operations.

**COD EUROSUL:** 090961

**IMPA:** ---

**Part Number:** C26664-01

**Approvals:**

## Specifications

### Features

**Input:** 100-240V AC, 50-60 Hz

**Output:** 14.7V DC, 1A

**Certifications:** CE, UKCA, EN60601-1

**Compatibility:** 12V lead-acid batteries for FSP127 Aldis

**Indicators:** LED (orange – charging / green – ready)

### Applications

Charging of 12V batteries for FSP127 Aldis lantern

Use in maritime and offshore operations

### Benefits

**Readiness:** Clear visual indication of charging status

**Durability:** Robust construction for demanding maritime environments

**Safety:** Protection against overload, short-circuit and overheating
