

15min PVC Wall-Mounted EEBD Case for Emergency Escape Equipment

The 15min PVC Wall-Mounted EEBD Case provides a safe and efficient storage solution for Emergency Escape Breathing Devices (EEBD). Crafted from high-quality rigid PVC, this robust case ensures complete protection for the EEBD, including the mask and 200 bar cylinder, providing 15 minutes of autonomy in emergency scenarios. Its wall-mount design enables easy installation, ensuring quick access in critical moments.

COD EUROSUL: 005312

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features:

Design: Rigid PVC structure with wall-mount fitting for easy equipment access

Mounting: Stainless steel hardware resistant to corrosion

Function: Stores and protects EEBD units from impact and external agents

Capacity: Suitable for 15-minute EEBD devices

Benefits:

Safety: protects escape equipment from damage and contamination

Practicality: easy installation and quick access in emergencies

Durability: high-strength materials ideal for marine environments

Technical Specifications:

Material: Rigid PVC

Fixings: Stainless steel

Dimensions: 57 × 27 × 17 cm
