

15min PVC Wall-Mounted EEBD Case – Storage and Display for Emergency Escape Equipment

The 15min PVC Wall-Mounted EEBD Display Case provides an innovative and practical solution for storing and quickly viewing the Emergency Escape Breathing Device (EEBD). Made of high-durability rigid PVC and featuring a transparent cover, it allows visual inspection of the pressure gauge without opening the case, streamlining safety checks. With an IP 54 rating, it is resistant to dust and water splashes, making it ideal for maritime and industrial settings that require secure and ready access to emergency equipment.

COD EUROSUL: 091391

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features:

Material: Rigid PVC with transparent cover, providing durability and constant visibility

Visibility: direct access to pressure gauge for quick inspection without opening

Design: lightweight and easy to install, suitable for confined spaces

Protection: IP54 rating against dust and water splashes

Benefits:

Safety: ensures continuous visual monitoring of the equipment

Practicality: simplifies maintenance and ensures immediate readiness

Durability: robust construction suitable for marine and industrial environments

Technical Specifications:

Material: Rigid PVC with transparent cover

Dimensions: 61 × 32 × 20 cm

Weight: 1.2 kg

Protection rating: IP54
