

## 24V 60W P15D Spare Lamp for Lantern Aldis FSP127

The D1754 lamp is an original spare part for Aldis Signaling Lanterns, Francis FSP127 model. With power of 60W and base P15D, it operates in 24V and is used to issue visual signals in Morse code. Essential to ensure continuous equipment operation, the lamp offers stable and reliable performance and is suitable for demanding maritime applications, according to Sole Convention guidelines.

**COD EUROSUL:** 092456

**IMPA:** ---

**Part Number:** D1754

**Approvals:** ---

## Specifications

### Benefits:

**Readiness:** Simple installation for immediate maintenance of the signaling system.

**Durability:** Long -life lamp, ideal for maritime environments.

**Security:** Powerful and stable light for morse signaling according to international standards.

Essential component for maintaining the FSP127 lantern operating with efficiency and safety in visual communication missions at sea.

### Technical Specifications:

**Model:** D1754

**Power:** 60W

**Voltage:** 24V DC

**Base:** P15D (APFDC Type)

**Application:** Aldis FSP127

**Light Type:** Focus Directed to Morse Signals

**Installation:** Direct Lantern Substitution

**Certifications:** Compatible with equipment that meets solas standards

**Applications:** Replacement for Aldis Visual Communication Manual Signs on Commercial

Vessels, Offshore Platforms, War Ships and Rescue Boats.
