

ACR 6V 2714.4 Battery for SART Pathfinder III

The ACR 6V 2714.4 battery is a high-efficiency, non-rechargeable power source designed for use in SART Pathfinder III radar transponders. Made with lithium and manganese dioxide cells, it ensures reliable performance and long-lasting durability, meeting strict maritime safety standards.

COD EUROSUL: 000317

IMPA: ---

Part Number: 2714.4

Approvals: ---

Specifications

Features

Material: Lithium with manganese dioxide and chemical solvents

Fasteners: Not applicable

Design: Compact, durable, and safe for maritime environments

Dimensions: Not specified

Applications

Power supply for maritime radar transponders SART Pathfinder III

Benefits

Readiness: Always available for emergency use

Durability: Long service life even under extreme conditions

Safety: Designed to minimize risks of leakage or explosion

An essential product for maritime operations requiring high reliability and compliance with safety standards

Technical Specifications

Material: Lithium with manganese dioxide and chemical solvents
