

Aldis 24V FSP127 lamp – projectile without accessories

The Aldis FSP127 24V lamp is a portable visual signaling equipment developed according to the requirements of the Solas Convention, ideal for commercial vessels and naval operations.

Designed for morse code communication between ship or between ship and coast, this flashlight offers high performance in daytime visibility. This version is provided without additional accessories such as filters, battery or transportation case.

COD EUROSUL: 000601

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features:

Material: Aluminum body with high purity aluminum parabolic reflector

Fixers: Pin connector (not included)

Design: Compact, with semi-sprout black enamel finish, IP56 protection

Dimensions: 47 cm x 21 cm x 25 cm (approximately)

Applications:

Visual signaling in accordance with solas

Communication by morse between vessels

Use in emergency situations and offshore operations

Benefits:

Readiness: Ideal for immediate use in substitutions or complementation of existing systems

Durability: robust and resistant construction of shocks, weather and thermal variations

Security: Allows efficient and precise visual communication, even in the light of day

A reliable and robust choice to ensure compliance with international maritime safety standards.

Technical Specifications:

Material: Aluminum with parabolic internal reflector

Fixers: pin connector (not included)

Dimensions: 47 cm x 21 cm x 25 cm

Weight: 2.2 kg

Voltage: 24V

Lamp power: 60W

Lamp life: approximately 100 hours
