

## Anti-flame blanket 1200 x 1800mm-CE Certification EN1869/92

The 1200 x 1800mm anti-flame blanket is an indispensable item for safety in emergency situations. Designed to stifle small fires or protect people during evacuations, it acts efficiently by blocking oxygen and preventing the spread of flames. Made of high thermal resistance fiberglass, it supports temperatures up to 550 °C. This model has CE certification and strictly serves the European norm EN1869/92, offering reliability for use in industrial, naval, offshore and also domestic environments.

**COD EUROSUL:** 003654

**IMPA:** ---

**Part Number:** ---

**Approvals:**

## Specifications

### Benefits

**High Thermal Resistance:** withstands up to 550°C

**CE Certification:** compliant with EN1869/92 standard

**Versatile Use:** fire extinguishing or personal protection during evacuations

**Durability:** made of high-strength fiberglass

### Applications

**Ships and Offshore Platforms**

**Industries and Factories**

**Industrial and Commercial Kitchens**

**Workshops, Shipyards, and Domestic Environments**

## Technical Specifications

**Dimensions:** 1200 x 1800mm

**Material:** uncoated fiberglass

**Thickness:** 0.43mm

**Weight:** 430g/m<sup>2</sup> ±10

**Thermal Resistance:** -120°C to +550°C

**Certification:** CE – EN1869/92
