

B -MAX Red Signaling Lantern – Rechargeable, LED, Waterproof, Aeronautical Signaling

The B-Max Red Signaling Lantern is a light, compact and high-intensity light equipment, ideal for signaling operations in helipads, airports and landing areas. With anti-corrosive aluminum body and water resistant design, it offers 800 LED power heats and 5 operating modes: high light, medium, low, flashing and strobo. Accompanies a coupon beacon stick for use as an emergency flag in night operations or low visibility.

COD EUROSUL: 092393

IMPA: 792168

Part Number: ---

Approvals: ---

Specifications

Features

Material: Anti-corrosive aluminum body

Fixers: Integrated pocket clip

Design: Telescopic with adjustable focus (zoom 1–2000x), lightweight and portable

Dimensions: 13.5 cm x 3.3 cm x 3 cm

Weight: 120 g

Color: Black

Applications

Ideal for aircraft signaling in ground operations, runway traffic control, helipad safety, airport emergencies, and visual support in low-light environments.

Benefits

Readiness: Rechargeable via bivolt charger (110V/220V) with included adapter

Durability: Rain and splash-resistant construction, powered by 18650 lithium battery (6800 mAh)

Versatility: Includes signaling baton and multiple light modes for ground operational use

Technical Specifications

Power source: 18650 rechargeable lithium battery (6800 mAh)

Charging: Bivolt – 110V/220V DC

Light modes: High, Medium, Low, Flashing, Strobe

Power: 800 lumens / 38,000W

Light color: Red (with signaling baton)

Zoom: Adjustable telescopic 1–2000x

Resistance: Rain and splash-proof (water-resistant)

Packaging Contents

1 EC-900 flashlight

2 rechargeable 18650 batteries

1 bivolt charger

1 charging adapter

1 signaling baton

1 packaging box
