

Braided Polypropylene 3-Strand White Ropes – High Strength and Flexibility

The Braided Polypropylene 3-Strand White Ropes are designed for various maritime, industrial, and securing applications. Made from high-quality polypropylene, they provide strength, flexibility, and long-lasting durability. Their braided structure enhances safety and performance, making them ideal for light mooring, flagpoles, and marine use.

COD EUROSUL: 091224

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Available Sizes

8 mm x 220 m – Braided – Code: 091224

10 mm x 220 m – Braided – Code: 090959

Benefits

High strength and flexibility: Thanks to braided construction

Lightweight and easy to handle: Ideal for quick installations

UV protection: Ensures durability under prolonged sun exposure

Versatile use: Suitable for flagpoles, light mooring, and marine applications

Applications

Flag attachment: On nautical and industrial masts

Marine use: On boats and port structures

Light mooring: For temporary onboard fixings

Technical Specifications

Material: 3-strand braided polypropylene

Diameter:

8 mm and 10 mm

Length: 220 meters

Color: White

Breaking Load: Up to 685 KGF
