

## Bridge Distress Kit – Container with 12 SOLAS/MED Parachute Rockets

The Bridge Distress Kit is a complete maritime emergency signaling set consisting of 12 red parachute rockets stored in a rigid container, ready for immediate deployment in critical situations. Designed for ship bridges, commercial vessels and certified maritime operations, the kit complies with SOLAS/MED requirements, ensuring maximum performance in search and rescue operations. Each parachute rocket launches a red distress signal to approximately 300 meters in altitude, remaining visible for at least 40 seconds with an intensity of 30,000 candela. Built with a durable cylindrical body, pull-wire ignition system and high-performance pyrotechnic composition, the device delivers safe and reliable operation even after immersion in water or exposure to harsh environments.

**COD EUROSUL:** 090058

**IMPA:** ---

**Part Number:** ---

**Approvals:** ---

## Specifications

### Features:

**Application:** maritime distress signaling for ship bridges and certified vessels

**Vertical reach:** up to 300 m

**Burn time:** minimum 40 s

**Luminous intensity:** 30,000 cd

**Signal type:**

red – long range

**Ignition:** pull-wire system

**Storage:** rigid container for quick access

**Certifications:** SOLAS, MED, USCG (per model)

**Benefits:**

**Maximum visibility:** optimized for day and night rescue

**Reliability:** operates safely after water immersion

**Safety:** controlled pull-wire ignition

**Compliance:** fully meets SOLAS/MED international requirements

**Technical Specifications:**

**Signal model:** Parachute Rocket MK8A (or SOLAS-equivalent)

**Quantity:** 12 units

**Length:** 295 mm

**Diameter:** 32/38 mm

**Weight:** 270 g

**Pyrotechnic composition:** magnesium, strontium nitrate, potassium perchlorate, PVC and additives

**Hazard classification:** 1.3G – UN 0505
