

Camon Water Detection Paste – 75g

The Camon Water Detector Folder is a reliable solution for detecting the presence of water in fuel and other liquids stored in tanks and reservoirs. Formulated to react quickly to contact with water, this folder changes color instantly, allowing a clear visual identification of the presence of contaminants.

COD EUROSUL: 000361

IMPA: 650890

Part Number: ---

Approvals: ---

Specifications

Specifications:

Weight: 75g

Application: identification of the presence of water in fuels and stored liquids

Method of Use: Apply to ruler or tank measurement rod and observe color change

Security: Composed of non -dangerous ingredients as FDS

Benefits:

Quick Answer: Reacts instantly to contact with water

Easy application: can be used with measuring rulers for rapid inspection

Safety and reliability: not corrosive and safe to handle

Versatile application: Ideal for gas stations, ships, industries and liquid storage

Applications:

Monitoring of fuel tanks in ships and industrial facilities

Diesel, gasoline and other fuels detection

Reservoir inspection and liquid storage systems
