

Chemical Protection Clothing Type 1b RHF -II Size XL – CCS Certificate

RHF-II chemical protection clothing, certified according to solas and CCs, is designed for use in industrial and maritime environments where there is a risk of exposure to aggressive gases and chemicals. Classified as type 1b clothing, it offers total user protection, including airtight sealing, integrated hood and fixed boots. The model follows a pair of loose gloves, optimizing safety and operation in emergency or chemical intervention situations.

COD EUROSUL: 000066

IMPA: ---

Part Number: A140349

Approvals:

Specifications

Material: High Chemical Resistance PVC

Fixers: Front zipper with double sealing flap and waist belt adjustment

Design: Jumpsuit with integrated hood, coupled boots and elastic fists

Dimensions: Size XL

Applications:

Offshore environments with chemical risk

Toxic gases leakage interventions

Handling of dangerous substances in ports and shipyards

Chemical and petrochemical industries

Benefits:

Readiness: provided as a complete set, ready for immediate use in emergencies

Durability: reinforced PVC construction for longer life and resistance to aggressive agents

Safety: CCS certification and standard solas ensure protection in accordance with international maritime safety standards

Ideal for critical operations, RHF-II clothing offers safety, resistance and reliability in hostile chemical risk environments.
