

China Silver Reflective Ribbon – 50mm x 45.70m

China reflective tape is a visual signaling product designed for various applications where natural or artificial light is desired in maritime, industrial or logistics environments. Although it does not have international certifications, it has high reflective power and strong adhesion, being indicated for use in whales, buoys and equipment where the standard is not mandatory. It has a prismatic pattern and excellent value for money for safety markings.

COD EUROSUL: 000982

IMPA: 330189

Part Number: ---

Approvals: ---

Specifications

Features

Material: Silver prismatic reflective film

Color: Silver

Adhesive: High adhesion and water-resistant glue

Application: Ideal for visual signaling on smooth surfaces

Applications

Non-certified visual signaling equipment

Lifeboats, buoys and onboard auxiliary materials

Complementary signaling on vessels, vehicles or industrial areas

Ideal for low-light environments

Benefits

High Reflection: Increases visibility in low-light conditions

Easy Application: High-performance adhesive for quick installation

Resistance: Durability in outdoor and humid environments

Technical Specifications

Material: Silver prismatic film with high-adhesion adhesive

Width: 50mm

Length: 45.70 meters

Color: Silver

Certification: Non-certified product (not approved for SOLAS use)

IMPA Code: 330189
