

Circular Lifebuoy 4kg x 70cm

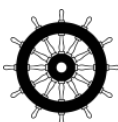

High -floaty circular float, developed for emergencies on vessels, ensuring safety on board for sailors and passengers. According to the 1974 Solas Regulations (1996 amendments), LSA and MSC81, it has BV and CCS certifications. Built with an outer layer of low -pressure polyethylene and polyurethane interior, it is designed to meet the rigorous international maritime requirements.

COD EUROSUL: 004282

IMPA: ---

Part Number: ---

Approvals:

Specifications

Features

Material: Low pressure polyethylene (outer layer) and polyurethane (interior)

Design: Circular, with reflective tapes and safety strings

Dimensions: Weight of 4 kg; diameter of 70 cm

Certification: Approved by SOLAS 1974, BV and CCS

Applications

Indispensable equipment for commercial and passenger vessels

Use in emergencies for rescue of crew and passengers fallen into the water

Benefits

Readiness: Available for immediate use in emergency situations

Durability: High resistance to impacts and adverse conditions in the maritime environment

Safety: Reflective material for greater visibility and compliance with international standards

Technical Specifications

Material: Polyethylene and polyurethane

Fixers:

Integrated safety strings

Dimensions: Weight of 4 kg; diameter of 70 cm
