

Container/Tube for Safety Projects to fix on the wall

Container/Tube for Security Projects is an efficient and safe solution for storing essential documents related to operational safety. Made of rigid PVC, it offers excellent impact protection and exposure in adverse environments. Its design with wall attachment system ensures easy access, quick view and greater organization of safety plans, pops, inspection reports and emergency records.

COD EUROSUL: 003492

IMPA: 332613

Part Number: ---

Approvals: ---

Specifications

Benefits

Readiness: Keeps documents accessible for audits and emergencies.

Durability: Resistant to impacts and environmental exposure.

Safety: Protects and preserves critical documents in harsh conditions.

Versatility: Suitable for maritime, industrial, educational, and healthcare sectors.

Applications

Storage and protection of safety documents and operational plans on vessels, offshore platforms, factories, schools, and hospitals.

Technical Specifications

Material: High-strength rigid PVC.

Mounting: Wall system (screws and anchors not included).

Design: Closed tube with lid for secure ROY document storage.

Dimensions: 105 cm x 13 cm x 12 cm.

Weight: 2.1 kg.
