

2 mm Stainless Steel Chain for Hydrants with Brass S Hooks – AISI 316

Safety chain made of 2 mm AISI 316 stainless steel, specifically designed for marine hydrant systems. Used to secure blank caps to hydrant outlets, ensuring proper organization and safety in maritime and industrial environments. The chain includes two brass S-type hooks for easy attachment and excellent corrosion resistance. This component is ideal for firefighting systems on vessels, offshore platforms, and port facilities.

COD EUROSUL: 090473

IMPA: 333426

Part Number: ---

Approvals: ---

Specifications

Features:

Material: Stainless steel AISI 316

Diameter: 2 mm

Hooks: Brass S-type

Resistance: Excellent against marine corrosion

Finish: Polished

Assembly: Strong and secure

Applications:

Primary use: Marine hydrant systems

Systems: Firefighting systems on vessels

Environments: Offshore platforms and commercial ships

Locations: Port and industrial facilities

Function: Retention of hydrant blank caps

Benefits:

Durability: Superior in saltwater environments

Installation: Easy with brass hooks

Organization: Keeps hydrant caps secure and organized

Certification: Marine-grade approved materials

Technical Specifications:

Material: AISI 316 stainless steel + brass

Chain diameter: 2 mm

Hook type: S-shape

Compatibility: IMPA standard 333426

Assembly: Ready-to-use
