

Daniamant R Ext Battery for External Boat Light PN1731

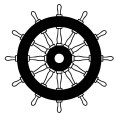

The Daniamant R Ext PN1731 battery is designed to power external lights on survival craft, ensuring high performance and energy efficiency. With half the size of the previous model, its compact design provides space savings without compromising power. Certified by MED and IMO SOLAS, this battery meets the highest maritime safety standards. Built for extreme environments, it provides over 4.3 candelas of illumination and at least 12 hours of continuous operation. Its estimated lifespan is up to 5 years under normal conditions.

COD EUROSUL: 001115

IMPA: ---

Part Number: 1731/IB-046

Approvals:

SOLAS

Specifications

Features

Material: Lithium, sulfur dioxide, and acetonitrile

Duration: Minimum of 12 hours of continuous operation

Efficiency: Provides more than 4.3 candelas of illumination

Service Life: Up to 5 years

Design: Compact, lightweight, and optimized for maritime environments

Applications

Power supply for external lights in survival craft and maritime operations

Benefits

Readiness: Reliable power for emergency situations

Durability: Resistant to extreme maritime conditions

Safety: Certified by IMO SOLAS and MED, ensuring compliance with international regulations

The Daniamant R Ext PN1731 battery is essential for survival craft, providing reliable and long-lasting illumination in critical situations

Technical Specifications

Material: Lithium, sulfur dioxide, and acetonitrile

Duration: Minimum of 12 hours

Illumination: More than 4.3 candelas

Service Life: Up to 5 years
