

EA12/750 D-Shaped Throat PTT Microphone with Earpiece Entel

The Entel EA12/750 throat PTT microphone is a professional communication accessory designed for demanding and high-noise environments. Featuring a soft rubber “D”-shaped earpiece, it fits securely over the ear, providing comfort and stability during prolonged use. The unit combines an in-line microphone and PTT button, allowing users to make and receive calls without removing the radio from their belt. A rotating strain relief clip can be attached to the collar, preventing accidental dislodging of the earpiece if the cable is pulled. Designed for light to medium-duty applications, the EA12/750 is intended for personal allocation to maximize service life. It is compatible with Entel HT644 and HT649 radios, delivering clear and reliable communication in industrial, maritime, and professional operations.
