

Encapsulated Braided PP Rope 8mm x 30m

The Encapsulated Braided PP Rope 8mm x 30m is designed for maritime applications, especially for lifebuoys and offshore operations. Made of high-strength polypropylene, it features an encapsulated coating that enhances durability, abrasion resistance, and longevity, even under harsh conditions. It maintains flexibility after prolonged use, ensuring greater efficiency and safety in operations.

COD EUROSUL: 000678

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Benefits:

High Durability: Designed to withstand wear in demanding marine environments.

Abrasion Resistance: The encapsulated coating provides extra protection against external damage.

Prolonged Flexibility: Maintains its pliability even after extended use.

Efficiency and Safety: Ideal for lifebuoy operations and other nautical applications.

Stronger than Nylon: Offers greater tensile strength and wear resistance.

Applications:

Safety Equipment: Used in lifebuoys and marine rescue systems.

Offshore Environments: Perfect for use on platforms, vessels, and ports.

General Nautical Use: Suitable for various operations requiring high-strength ropes.

Technical Specifications:

Material: Encapsulated polypropylene

Diameter: 8mm

Length: 30m

Resistance: High resistance to abrasion and wear
