

Entel CNB950EV2

Rechargeable Battery for DT885 and DT985 Radios

The Entel CNB950EV2 rechargeable battery is designed to provide reliable power for Entel DT8XX and DT9XX series portable radios. Compatible with DT885 and DT985 models, it delivers stable performance and extended operating time for professional use. Built with lithium-ion technology, the CNB950EV2 is free from memory effect, ensuring longer service life and efficient charging. It is suitable for industrial, maritime, and offshore environments where dependable communication is critical.

Approvals: ---

Specifications

Benefits:

- Long service life with Li-Ion technology and no memory effect
- Reliable performance for extended operating shifts
- Wide compatibility with Entel DT8XX and DT9XX radios
- Suitable for industrial and hazardous environments

Technical Specifications:

Model: CNB950EV2

Type: Rechargeable lithium-ion battery

Compatibility: Entel DT885, DT985, DT8XX and DT9XX radios

Application: Industrial, maritime, and offshore communication
