

EPDM fire hose MB1 50A 25mt x 2" – No connection

The EPDM MB1 50a 25mt fire hose is designed to meet fire fighting requirements in naval and industrial environments. Produced in reinforced EPDM, it has excellent thermal, chemical and mechanical resistance, supporting high pressures and extreme temperature variations. Its 25 meter length and 2" diameter guarantee efficient flow and scope in critical areas. This model is supplied without connections, allowing customization according to the couplings required by the vessel or installation fire fighting system.

COD EUROSUL: 001127

IMPA: 330708

Part Number: ---

Approvals: ---

Specifications

Features:

Material: Reinforced EPDM

Fixers: Not applicable (model without connection)

Design: flexible and robust tube, with excellent weather resistance

Dimensions: 25 meters long x 2 "(50a) in diameter

Applications:

Vessels and ships: fire fighting system on board

Offshore platforms: fire protection in critical environments

Industrial facilities: use in high risk areas with the need for thermal resistance

Benefits:

Readiness: ease of handling and implementation in personalized systems

Durability: high quality EPDM for continuous use under severe conditions

Safety: resistance to abrasion, chemical agents and thermal variations

Essential product for safe and effective operations in places with strict fire safety standards.

Technical Specifications:

Material: Reinforced EPDM

Fixers: Not applicable

Dimensions: 25 m x 2 "(50a)

Model: No connection
