

Fiber Box for International Connection – Imported

The international connection fiber box is designed for the safe storage of emergency water connection equipment. Made of resistant and durable material, it protects components against weather, impacts and corrosion, ensuring the integrity of essential accessories for maritime operations. Its compact and robust design, with dimensions of 23.5cm x 26.8cm x 23cm, allows easy installation on offshore ships and platforms. The secure closure lid provides quick access to content in emergency situations.
