

Fire Belt With Talabarte – CERE CERTIFICATE EN358 – German Sitex

The Sitex Talabarte Fire Belt is a robust and reliable solution for firefighting and rescue operations. Made in Germany, in black flame retardant black polyester, is highly resistant to abrasion, heat and mechanical wear. The belt has CE certification and strictly serves the EN 358 European standard, offering protection and support for work at height, anchor points or in situations that require safe containment. The reinforced talabarter allows stable fixation, increasing operator safety in risk environments. Its ergonomic design and adjustment system provide excellent comfort, even in long operations.
