

Firefighter Helmet Penco Fhusa01 – Red and Yellow Colors – CE CERTIFICATE EN443

The Foss Fhusa01 Firefighter Helmet is a Personal Protective Equipment (PPE) designed to offer safety in firefighting operations in naval, industrial and offshore environments. Made of high thermal resistance ABS fiberglass, the equipment strictly meets the EN443: 2008 and EN397 standards, with CE certification. It has a polycarbonate articulated display, natural leather cervical protector and internal safety jugular adjustment system, ensuring comfort, protection and stability in critical situations.

COD EUROSUL: 005227

IMPA: 31.1501 – Fireman’s Helmet,
with Neck Protector

Part Number: FHUSA01

Approvals:

Specifications

Brand: PENCO

Available Versions: Eurosul Code 005227 – Yellow | Eurosul Code 003516 – Red

Material: ABS fiberglass resistant to high temperatures

Fasteners: Internal adjustment system with safety chinstrap

Design: Helmet with transparent articulated visor and natural leather neck protector

Available Colors: Yellow (005227) and Red (003516)

Standards: EN443:2008 and EN397 (CE Certification)

Applications:

Firefighting in maritime and industrial environments
Emergency and rescue interventions
Operations in areas with thermal risk and falling objects

Benefits:

Readiness: Ergonomic structure with easy adjustment and fitting
Durability: Robust construction with certified thermal and mechanical resistance
Safety: Integrated facial and neck protection with electrical compliance

The PENCO FHUSA01 helmet is an essential PPE for brigades operating in high-risk scenarios, ensuring compliance with European personal protection standards.
