

Foam Generating Liquid LGE AFFF 3% HC Argus Prime – 20 Liter Pail

The Argus Prime AFFF 3% HC Foam Generating Liquid is a fire-fighting agent designed for the suppression of flammable liquid fires involving hydrocarbons. Its formulation enables the rapid formation of a stable foam blanket that separates the fuel from oxygen and significantly reduces the risk of re-ignition, ensuring effective performance in critical scenarios. Supplied in a 20-liter pail, the product is suitable for industrial, marine, and offshore applications, delivering reliable performance in both fixed and mobile fire-fighting systems. The Argus Prime range fully complies with current environmental requirements, containing no intentionally added PFOA and presenting non-detectable PFOS levels, in accordance with European regulations.

COD EUROSUL: 097994

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Benefits:

Effective suppression of hydrocarbon class fires

Environmentally responsible formulation with no intentionally added PFOA

Non-detectable PFOS levels, below 10 ppb

Compliant with Regulation (EU) 2019/1021

Suitable for industrial, marine, and offshore environments

Applications:

Industrial fire-fighting systems
Offshore platforms and oil and gas facilities
Vessels, ports, and terminals
Warehouses and flammable liquid storage areas

Technical Specifications:

Type: AFFF 3% HC foam generating liquid

Recommended dosage: 3%

Packaging: Pail

Volume: 20 liters

Chemical base: Synthetic foam produced by telomerization

PFOA: Not intentionally added

PFOS: Non-detectable levels (<10 ppb)

Environmental compliance: Regulation (EU) 2019/1021
