

Galvanized Cradle with Mooring Strap for Inflatable Rafts

The Galvanized Cradle with Mooring Strap is a highly reliable and adjustable solution for storing and launching inflatable liferafts on vessels. Designed to accommodate various types and sizes of rafts, this cradle ensures secure and effective support. Its robust, galvanized structure equipped with an adjustable mooring strap allows for deployment at different angles, including oblique launches, essential for quick response in maritime emergencies.

Specifications

Technical Characteristics

Material: Fully galvanized structure, offering excellent corrosion resistance and durability in marine environments.

Painter rope: Includes an adjustable strap providing flexibility and safety when fitting the cradle to the specific size of the liferaft.

Capacity: Designed to store and launch a single inflatable liferaft, optimizing space usage and efficiency in emergencies.

Locking device: Ensures the liferaft remains fixed and secure under any conditions until the moment of launch.

Benefits

Enhanced safety, with galvanized structure and robust locking system to ensure the integrity of the liferaft in adverse conditions.

Adaptability, with flexible adjustment allowing compatibility with existing liferafts on board, offering a

customized solution.

Efficient operation, enabling quick and safe liferaft deployment, crucial in emergency situations.

Applications

Ideal for commercial and recreational vessels, perfect for ships requiring a reliable system for storing inflatable liferafts, ensuring safety and readiness.

Conclusion

The galvanized cradle with painter rope for inflatable liferafts is essential for maritime operators seeking a safe and efficient solution for storing and launching liferafts. Its robust construction and adjustable features ensure reliable performance in critical situations.
