

Hammar H20R HRU Hydrostatic Release Valve for Liferaft – Model HR-0102

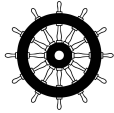

The Hammar H20R HRU Hydrostatic Release Valve, model HR-0102, is an essential release unit designed to ensure the automatic and safe release of liferafts in maritime emergency situations. This model strictly complies with safety standards set by international maritime authorities, including SOLAS, providing reliable and effective performance under critical conditions.

COD EUROSUL: 003500

IMPA: 330119

Part Number: HR-0102

Approvals:

SOLAS

Specifications

Features

Activation: Automatic between 1.5 and 4 meters depth.

Minimum breaking strength: 15 kN (white rope).

Weak link: Strength of 2.2 ± 0.4 kN (in accordance with SOLAS).

Label: Top label in English.

Weight: 0.220 kg.

Material: Durable rigid PVC.

Installation: Instructions included.

Applications

Liferafts with capacity from 6 to 150 people.

Maritime safety equipment on merchant ships, offshore vessels, and passenger ships.

Compatible solution with standard inflatable boat containers.

Benefits

Immediate readiness, with automatic activation without human intervention.

Proven safety, with international certifications and design approved by maritime authorities.

Easy installation, with lightweight structure and clearly marked system.

High reliability, ideal for extreme maritime operating conditions.

Package Contents

01 Hammar H20R HRU HR-0102 hydrostatic release unit.
