

Harvik Fire Boot – SOLAS/MED Certified

The CSA Omega Fire Bota is designed to ensure maximum protection in firefighting and rescue operations. With 16 inch height, it is made of flame retardant rubber and has thermal insulation, providing safety in high temperature environments. It has non-slip and chemical resistant steel sole, as well as lining in Kevlar Namex/Polyamide for additional protection. Its electrical resistance of up to 18kV meets the highest safety standards, including MED certifications.

COD EUROSUL: 002756

IMPA: ---

Part Number: ---

Approvals:

Specifications

Benefits:

Electrical protection: Withstands shocks up to 18KV

Fire resistance: Flame-retardant material with thermal insulation

Non-slip sole: Resistant to abrasion, chemicals, and rough terrain

Comfort and safety: Reinforced backstay and additional shaft protection

Global certifications: SOLAS, CE, MED, NFPA, CSA Z195-09 / ASTM F2413-11

Applications:

Firefighting: Structural and auxiliary firefighters

Wildfires: Strength and durability for extreme terrain operations

Rescue: Ideal for multi-risk protection in emergency situations

Specifications:**Brand:** HARVIK**Height:** 16 inches**Outer Material:** Flame-retardant rubber**Lining:** Kevlar Nomex/polyamide**Sole:** Abrasion, chemical-resistant, and non-slip steel**Electrical Resistance:** Up to 18KV**Certifications:** SOLAS, CE, MED, NFPA 1971-2013, CSA Z195-09 / ASTM F2413-11
