

High-Pressure Refill Station for PCP Air Rifles and Paintball

The High-Pressure Refill Station is expertly designed to meet the refilling needs of PCP air rifles and paintball equipment, delivering superior performance with exceptional safety. Suitable for both enthusiasts and professionals, this station is built with high-quality materials to ensure quick and secure refills. With components such as the SUS 304 stainless steel filling adapter and reinforced high-pressure hose, this station ensures durability even under intense use conditions. The pressure gauge provides accurate measurements up to 40 MPa, granting full control and safety during the refilling process.

COD EUROSUL: 005113

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features:

Robust construction: made of SUS 304 stainless steel and reinforced copper.

Precision: gauge reads up to 40 MPa for safe monitoring

Compatibility: suitable for refilling PCP air rifles and paintball equipment

Benefits:

Reliability: enables fast, safe refills with operational efficiency

Safety: components withstand up to 400 bar pressure

Durability: premium materials ensure long service life and consistent performance

Technical Specifications:

Filling adapter: SUS 304 stainless steel, 400 bar, G5/8 thread, weight 656 g

Hose:

50 cm, rated 63 MPa, with protective spring

Pressure gauge: up to 40 MPa, 40 mm diameter

Inlet thread: G5/8 male

Outlet thread: 8 mm quick coupling (reinforced copper)

Sealing: dual O-ring system with spare seals included
