

Holofote Floodlight 30W 100/277V 24/36V 900MA LE965LED-MAG

The Floodlight Le965LED-MAG spotlight is portable and robust lighting equipment, ideal for industrial, watercraft and rescue operations. With 30W of power, it provides light output equivalent to a 300W quartz halogen, consuming 90% less energy. Made with reinforced structure and without moving parts, it ensures greater durability and impact resistance. Its compact design and approximate weight of 2kg make it easy to transport and install. Evaluated for internal and external use, including humid environments.

COD EUROSUL: 002675

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features

Power: 30W (equivalent to 300W halogen)

Energy efficiency: 90% less consumption compared to halogen lamps

Voltage: 100-277V / 24-36V

Current: 900mA

Weight: Approximately 2kg

Construction: Robust structure, no moving parts and no bulbs to replace

Use: Indoor and outdoor, suitable for humid environments

Certification: Approved by CETLus

Applications

Maritime and industrial lighting: Ideal for high-performance environments

Rescue operations and emergencies: Reliable in critical situations

Shipyards, ports, and offshore environments: Resistant to harsh conditions

Benefits

High luminous performance: Excellent lighting with energy savings

Portable and durable design: Suitable for different environmental conditions

Low maintenance: No bulbs to replace
