

Hydrostatic Release Unit Hammar H20 HRU – Standard SOLAS Model (YELLOW) – HR-0100

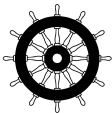

The Hammar H20 HRU Hydrostatic Release Unit, model HR-0100, is a crucial component for maritime safety, specifically designed to ensure the automatic release of lifeboats during emergencies. Complying with stringent SOLAS standards, this model is suitable for vessels accommodating between 6 and 150 people, ensuring a rapid and efficient response in emergency situations.

COD EUROSUL: 002761

IMPA: 330119

Part Number: HA2000H

Approvals:

SOLAS

Specifications

Features

Certifications: UKCA / CE (in compliance with SOLAS).

Activation depth: 1.5 to 4 meters.

Strength: White sling with a minimum breaking strength of 15 kN.

Weak link: 2.2 ± 0.4 kN.

Weight: 0.220 kg.

Material: High-durability rigid PVC.

Includes top label in English and installation instructions for boat containers.

Applications

Automatic release of lifeboats.

Small, medium, and large vessels.
Emergency systems in compliance with international standards.

Benefits

Ready for emergency use.
Reliable in extreme environments.
Enables quick evacuations.
Simple installation and minimal maintenance.
Compact and lightweight design.

Package Contents

01 Hammar H20 H hydrostatic release unit.
