

Icom BP-210N NiMH Battery for IC-A24 and IC-A6 Radios

The Icom BP-210N is a rechargeable Nickel-Metal Hydride (NiMH) battery with a nominal voltage of 9.6V and a capacity of 760mAh. Designed for IC-A24 and IC-A6 portable radios, it delivers excellent performance and reliability, making it ideal for aviation operations and critical communications.

COD EUROSUL: 000631

IMPA: ---

Part Number: BP-210N

Approvals: ---

Specifications

Features

Material: Nickel-Metal Hydride (NiMH) composition

Fasteners: Not applicable

Design: Durable, compact and compatible with specified models

Dimensions: Compatible with IC-A24 and IC-A6 radios

Applications

Aeronautical communication with IC-A24 and IC-A6 portable radios

Benefits

Readiness: Provides stable power for real-time communications

Durability: Extended lifespan even under demanding conditions

Safety: Meets safety standards for electronic equipment

Technical Specifications

Material: Nickel-Metal Hydride (NiMH)
