

## Icom BP-234 Emergency Battery for IC-GM1600 Radio

The Icom BP-234 is a non-rechargeable emergency battery designed for GMDSS IC-GM1600E radios. With a nominal voltage of 9.0V and a capacity of 3300mAh, it complies with strict maritime safety standards, ensuring reliable operation in critical situations.

**COD EUROSUL:** 003110

**IMPA:** ---

**Part Number:** BP-234

**Approvals:** ---

## Specifications

### Features

**Material:** Nickel-Cadmium (NiCd) and Nickel-Metal Hydride (Ni-MH) chemical composition

**Fasteners:** Not applicable

**Design:** Compact, durable and optimized for harsh conditions

**Dimensions:** Compatible with IC-GM1600E model

### Applications

Maritime emergency communication equipment

Operations in compliance with GMDSS standards

### Benefits

**Readiness:** Always available for emergencies with no need for recharging

**Durability:** Designed to withstand extreme conditions with long storage life

**Safety:** Robust structure and stable composition minimize risk of accidents

Essential for maritime operations, this battery ensures safe and efficient communication in critical situations

### Technical Specifications

**Material:** Nickel-Cadmium (NiCd) and Nickel-Metal Hydride (Ni-MH)
