

Inflatable Life Jacket 150N & 270N with Light – SOLAS/MED Certified

The 150N & 270N Inflatable Life Jackets are designed for maximum safety and compliance with SOLAS/MED standards, making them ideal for commercial vessels, yachts, and fishing boats. They feature individual inflatable chambers activated by automatic or manual valves (ISO 12402-7). Inflation is powered by 33g CO₂ cylinders for the 150N model and 60g CO₂ cylinders for the 270N, ensuring reliable buoyancy and quick emergency response. The inflatable chamber is made of high-visibility yellow fabric and stored in a Velcro-sealed compartment for easy handling and maintenance. The jacket includes a manual inflation tube with red relief valves (ISO 12402-7) and is adjustable for chest sizes up to 175 cm, expandable with belt extender.

Specifications

Features

Buoyancy: 150N (33g CO₂) or 270N (60g CO₂)

Inflation System: Automatic and manual

Material: High-visibility fabric

Closure: Velcro compartment for easy storage

Pressure Valves: ISO 12402-7 (red emergency type)

Adjustability: Chest size up to 175 cm, expandable with belt extender

Certifications

SOLAS (Safety of Life at Sea)

MED (Marine Equipment Directive)

IMO MSC.81(70) and MSC.200(80)

Applications

Commercial vessels, complying with mandatory maritime transport regulations

Yachts and fishing vessels, essential safety for medium and small craft

Maritime rescues, ideal for offshore operations and open-sea emergencies

Benefits

Fast inflation, even under extreme temperatures

High visibility, ensuring easy user location

Compact and adjustable design for convenient storage and comfortable use
