

SAILOR Handset with Cradle PN 406201A-00500

The SAILOR 6201 Handset, model PN 406201A-00500, is a professional communication handset designed by Cobham SATCOM for marine transceiver systems. It includes a cradle equipped with a magnetic sensor that automatically enables hook-on/off functionality when the handset is placed on the cradle. Built from durable materials and weighing only 0.4 kg, it provides excellent ergonomics, reliability, and full compliance with RoHS, REACH, and IMO MEPC.197(62) standards. Ideal for bridge communication, radio stations, and onboard emergency communication systems.
