

International Fire Connection Storz DN 2.1/2 “with adapter and buffer

The STORZ DN 2.1/2" International Firefighting Coupling with Adapter and Chained Cap by Eurosul is designed for high-efficiency integration in marine, offshore, and industrial fire suppression systems. Made from durable metal alloy, it offers fast connection, secure sealing, and compatibility with a wide range of setups. The integrated adapter enhances system flexibility, while the chained cap protects the coupling from debris and damage.

COD EUROSUL: 095378

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features

Material: High-resistance metal alloy

Fasteners: Quick Storz-type coupling with buffer and chain

Design: Robust body with reliable sealing and integrated adapter

Dimensions: DN 2.1/2"

Applications

Fixed firefighting systems on ships and offshore platforms

Port and industrial hydrants

Fire suppression networks in land-based facilities

Benefits

Readiness: Enables fast and efficient connection during emergencies

Durability: Corrosion and mechanical wear-resistant material

Safety: Equipped with buffer for protection and preservation of sealing

Eurosul's DN 2.1/2" Storz connection is essential to maintain the efficiency and safety of firefighting systems according to international standards.
