

## IS ATEX PTT Microphone for CXR PTT951C Entel

The Entel PTT951C IS ATEX PTT Microphone is designed to provide safe and reliable communication in potentially explosive environments. Developed for use with Entel CXR systems, this push-to-talk microphone allows instant communication without handling the radio directly, improving operational safety. Its rugged construction and ATEX certification make it suitable for maritime, industrial, and offshore applications where reliability is critical.
