

JEX-28 Needle Scaler Head with 3 mm and 4 mm Needles

JEX-28 disinkser support with 3mm and 4mm needles is an essential accessory for efficient equipment operation in industrial and naval applications. Designed to ensure stable needle fixation, it provides effective rust removal, inlaws and welding residues on metal surfaces. Made with high strength materials, support ensures durability and safety in severe environments. Compatible with the Jex-28 pneumatic discrediting. Compatible with the Jex-28 pneumatic discrediting, this accessory is available for 3mm and 4mm needles.

COD EUROSUL: 005523

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Benefits:

- Robust construction for resistance and durability in adverse conditions
- Models available with 3mm and 4mm needles for different applications
- Total compatibility with the Jex-28 pneumatic discrediting
- Efficiency in the removal of rust, ink and inlaws
- Ideal for offshore and industrial environments
