

Jotron CXL 3-1 Antenna for Aeronautical Radio

The Jotron CXL 3-1 antenna is designed for aeronautical radios, ensuring stable and reliable VHF communication. Its robust structure and high durability make it ideal for operations in harsh weather conditions, such as airports and runways.

COD EUROSUL: 003073

IMPA: ---

Part Number: CXL 3-1

Approvals: ---

Specifications

Features

Model: CXL 3-1

Frequency: 117–137 MHz

Impedance: 50 ohms

Connector: N-type female

Length: 1.50 m

Weight: 0.80 kg

Mounting: Compatible with adjustable mounts from 16 to 54 mm

Benefits

Reliability: Stable and clear VHF communication, essential for aeronautical operations.

Durability: Resistant to strong winds, heavy rain, and prolonged environmental exposure.

Easy installation: Compatible with various mounts, providing flexibility for multiple setups.

Applications

Aeronautical communication in airports, runways, and airbases.
