

Jotron RCH-20 Tron TR20 Fast Battery Charger Dual-Slot 12-24VDC

The Jotron RCH-20 fast battery charger, designed for Tron TR20 maritime communication equipment, meets the rigorous demands of GMDSS VHF systems. Featuring dual charging slots, it allows simultaneous battery charging, ensuring high operational efficiency. With a 12-24VDC input, it offers flexibility for various onboard electrical systems, making it a reliable solution for critical maritime operations.

COD EUROSUL: 002943

IMPA: ---

Part Number: 99920

Approvals: ---

Specifications

Features

Material: Robust structure resistant to maritime corrosion

Fasteners: Includes compatible mounting adapter

Design: Compact, functional and easy to install

Input: 12-24VDC / 700 mA

Applications

Charging batteries for Tron TR20 maritime radios

Use in vessels equipped with GMDSS systems

Benefits

Readiness: Fast charging to keep radios always operational

Durability: Built to withstand harsh maritime conditions

Safety: Complies with international safety standards for GMDSS equipment

Technical Specifications

Material: Components resistant to maritime corrosion

Fasteners: Mounting adapter included

Input: 12-24VDC / 700 mA
