

## JT20 Desinchruster Support with 3mm needle

The JT20 Desinchruster Support with 3mm needle support is an essential accessory for the maintenance and replacement of components in pneumatic discredits. Designed to be used with the JT20 model, this support provides safe 3mm needles fixation, ensuring high efficiency in removing inlaws, rust and coatings on metal surfaces. It is ideal for applications in the naval and offshore industry, where surface cleaning and preparation require high durability and performance tools.

**COD EUROSUL:** 005207

**IMPA:** ---

**Part Number:** ---

**Approvals:** ---

## Specifications

### Benefits:

**Compatibility:** Developed specifically for the pneumatic discredingering JT20.

**Removal Efficiency:** Rugged 3mm needle support, ensuring better cleaning performance.

**Durability:** Resistant material to support extreme conditions of industrial use.

**Easy replacement:** Designed for a quick and safe exchange of needles.

### Technical Specifications:

**Material:** High Resistance Metallic

**Needle Diameter:** 3mm

**Compatibility:** JT20 Desinctor

**Applicability:** removal of inlaid and rust on metal surfaces
