

Jutec 1600 x 1800mm anti-flame blanket-Germany

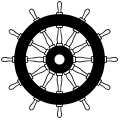

The Jutec Anti-Flame blanket is an indispensable equipment for the control and suppression of small fire outbreaks, acting rapidly and efficiently by muffling. Made in Germany, this blanket consists of fiberglass treated with flame retardant, offering high thermal resistance and durability. Designed for use in naval, offshore, industrial and professional kitchens, their robust construction allows you to face extreme temperatures, protecting people, equipment and facilities in emergency situations.
