

Fast Seal Dry Wrap Quick Repair Kit – 100mm x 3.6m

The Fast Seal Dry Wrap 100mm x 3.6m Fast Seal Repair Kit offers a quick, practical and permanent solution for sealing piping leaks, even submerged in freshwater or salty water. Compatible with materials such as steel, copper, galvanized, rubber, fiberglass, PVC and other metals, the kit is ideal for emergency applications and preventive maintenance.

COD EUROSUL: 003138

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features

Material: Fiber tape with water-activated resin

Fasteners: No additional fasteners required

Design: Compact kit for quick application without tools

Dimensions: 100 mm width x 3.6 meters length

Applications

Potable water lines

Fuel pipelines

Compressed air lines

Hydraulic systems

Emergency repair of naval and industrial piping

Benefits

Readiness: Immediate application with water only, no tools needed

Durability: Resists temperatures up to 350 °C and pressure up to 300 PSI

Safety: EPA approved for potable water lines, ensuring safety and compliance

Technical Specifications

Material: Fiber tape with water-activated resin

Fasteners: Not required

Dimensions: 100 mm x 3.6 m
