Specifications

Set Composition

- 1 base unit
- 1 launching tube
- 1 line box
- 2 floating plastic balls
- 1 projectile
- 1 CD/user manual

Technical Features

Nominal range: up to 90 m

Line: 5 mm diameter

Plastic balls: floating and resistant for Arctic use

Operation: pneumatic with compressed air

Certification: MED in accordance with Directive 2014/90/EU

Total weight: 11.4 kg

Operating pressure: 200–300 bar

Applications

Mooring between ships

Man overboard rescue

Shore-to-ship operations

Use in extreme environments, including Arctic regions

Benefits

reusable: reliable and safe equipment for multiple operations

safe: non-explosive system with low operational risk

certified: internationally approved (MED/DNV)

practical: easy to handle and maintain
