

Li-Ion Rechargeable Battery for Use with SOLO 365 PN SOLO 370

The Li-Ion rechargeable battery for the Solo 365 Kit (PN SOLO 370) is designed to ensure continuous operation of detection and testing equipment. With advanced technology, the battery offers high performance and durability, making it ideal for preventive maintenance and system testing. Its long life span and efficient rechargeability ensure ongoing operation without frequent replacements, meeting stringent safety and quality standards.

COD EUROSUL: 094456

IMPA: ---

Part Number: ---

Approvals: ---

Specifications

Features:

Type: Li-Ion rechargeable battery

Compatibility: Solo 365 (PN SOLO 370)

Technology: Li-Ion

Application: Battery replacement for system testing and maintenance

Certification: Compliance with safety standards

Benefits:

Safety: Safe operation in testing and detection equipment

Performance: High capacity and extended operation time

Efficiency: Fast and efficient recharge

Durability: Long life span and consistent performance

Technical Specifications:

Model: SOLO 370

Compatibility: Solo 365

Battery Type: Li-Ion rechargeable

Application: Replacement for Solo 365 Kit

Recharge Time: Standard for Li-Ion batteries
