

Lithium Battery for EPIRB E5/G5

The Lithium Battery for McMurdo EPIRB E5 and G5 is designed to ensure reliability in maritime emergencies. With an operational temperature range of -40°C to 55°C (-40°F to 131°F), this battery has a shelf life of up to 5 years and provides up to 24 hours of continuous operation once activated.

COD EUROSUL: 000518

IMPA: ---

Part Number: 82-970A

Approvals: ---

Specifications

EPIRB McMurdo E5/G5 Battery – Reliable Power for Maritime Emergencies

Technical Features

Material: Lithium-based chemical compound, encased in durable plastic housing

Fasteners: Not applicable

Design: Rugged construction for reliable performance in harsh maritime conditions

Dimensions: Not specified

Key Applications

Emergency power supply for McMurdo E5 and G5 EPIRBs

Advantages

Readiness: Guaranteed immediate operation in critical situations

Durability: Long shelf life of up to 5 years in storage

Safety: Certified for safe operation in extreme temperatures, meeting international maritime standards

Compliance

Essential product for vessels requiring maximum reliability in safety equipment

Technical Specs

Material: Lithium and chemical compounds
