

Lithium Battery for SART S5 McMurdo

The 92-050A lithium battery is designed for the SART S5 McMurdo, ensuring reliable power for maritime search and rescue operations.

Containing sealed lithium-manganese dioxide cells, it features a compact and secure design, with short-circuit protection and heat resistance.

COD EUROSUL: 091373

IMPA: ---

Part Number: 92-050A

Approvals: ---

Specifications

Technical Features

Composition: Lithium-manganese dioxide

Voltage: 6V

Capacity: 8.4 Wh

Weight: 34g

Safety: Short-circuit protection and heat resistance

Transport Certification: Class 9, UN3090 (Lithium Metal Batteries)

Key Applications

Replacement battery for SART S5 McMurdo

Ideal for maritime safety and rescue operations

Advantages

Readiness: Reliable power for emergencies

Safety: Sealed design prevents leaks

Sustainability: Complies with safe disposal guidelines (IMO and CE)

Compliance

Essential for maintaining SART S5 McMurdo operational readiness, ensuring performance and safety in critical situations
